- Evaluation
- Conclusion

Background

➤ Computational Creativity - Recipe creation studies

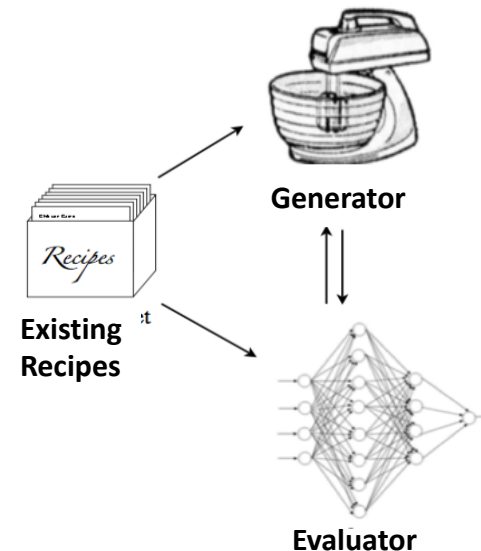

■ *Rule-based system*

(Johnathan Pagnutti, 2015)

■ *Machine learning-based system*

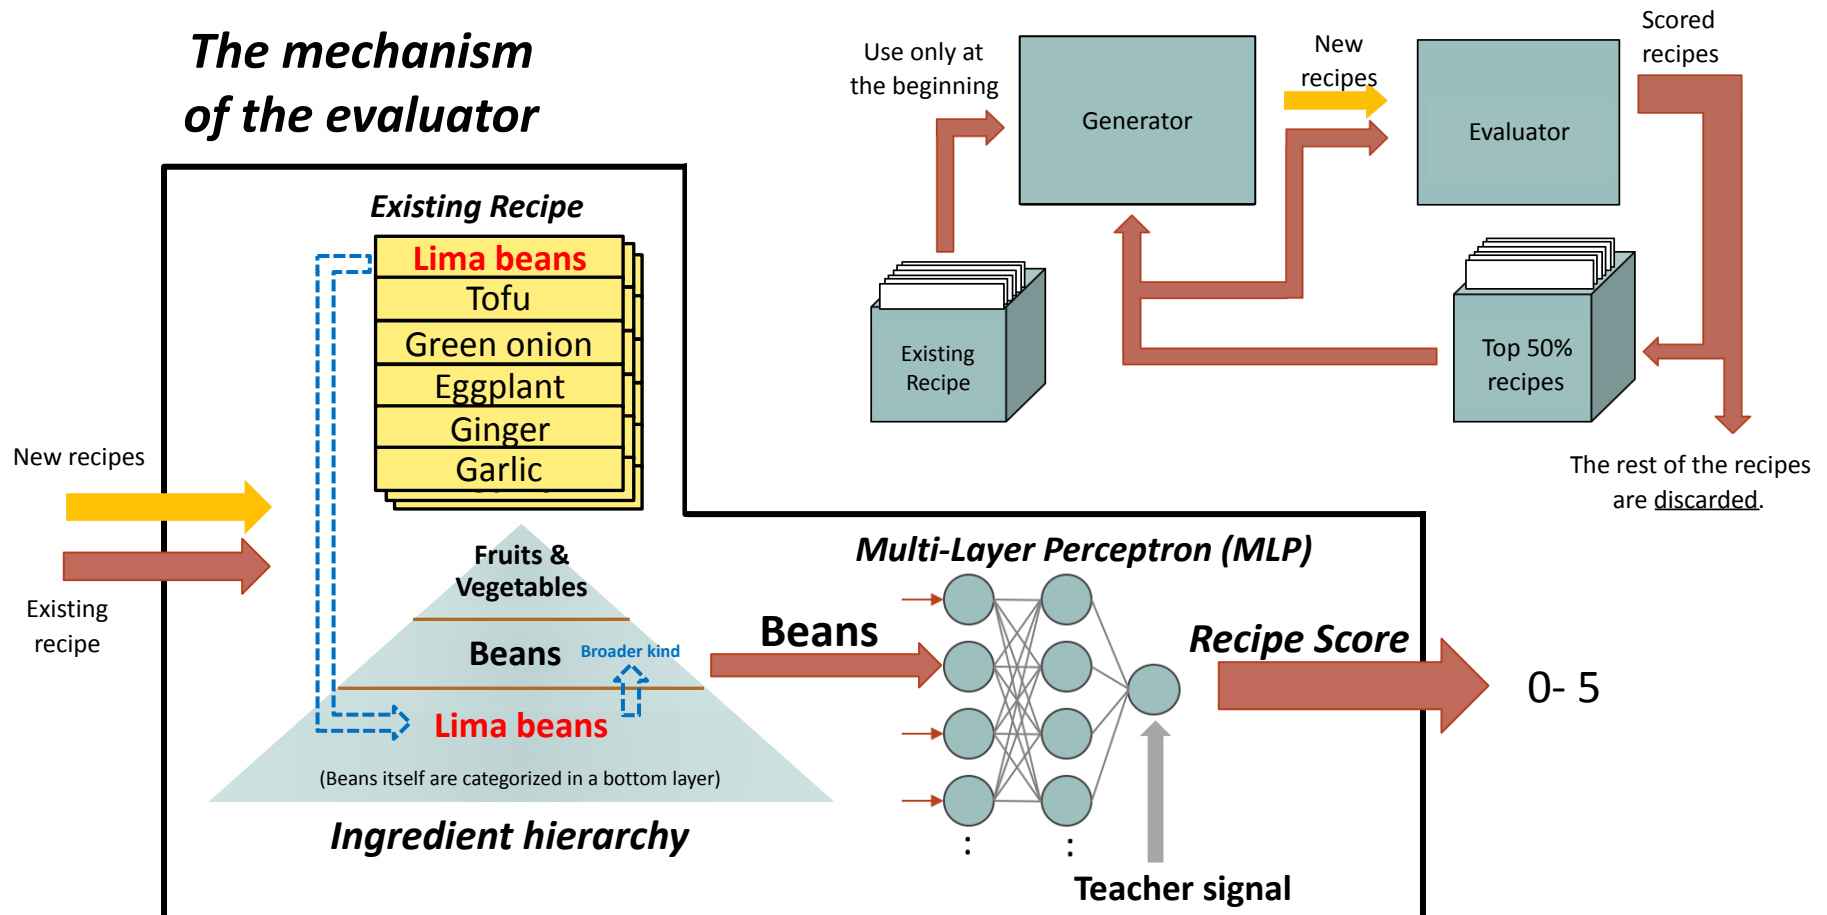

(Richard G. Morris, 2012)

Novelty	The same as human creation	✓
Tasty	✓	Tasty and Bad-Tasting

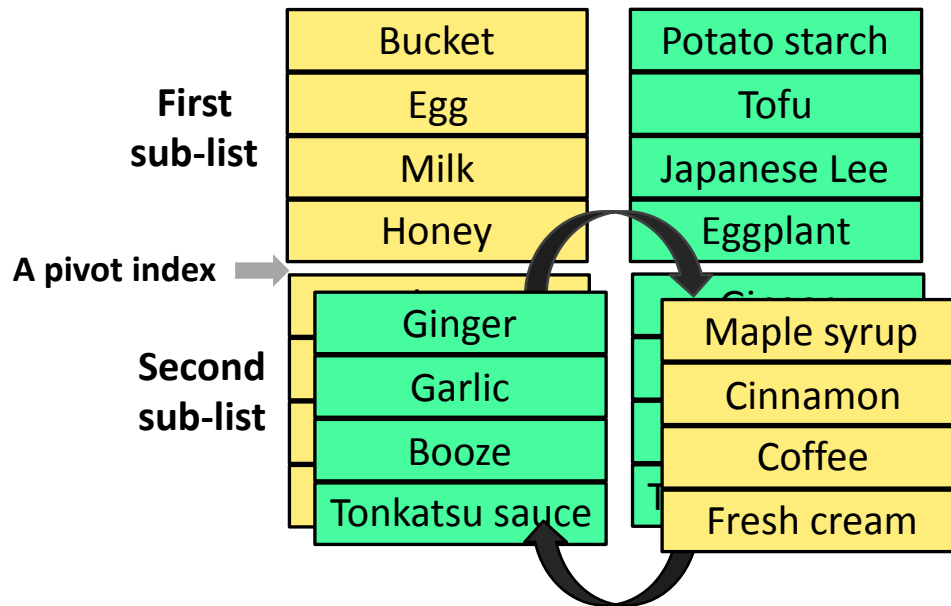

Related work (Richard G. Morris, 2012)

The mechanism of the evaluator

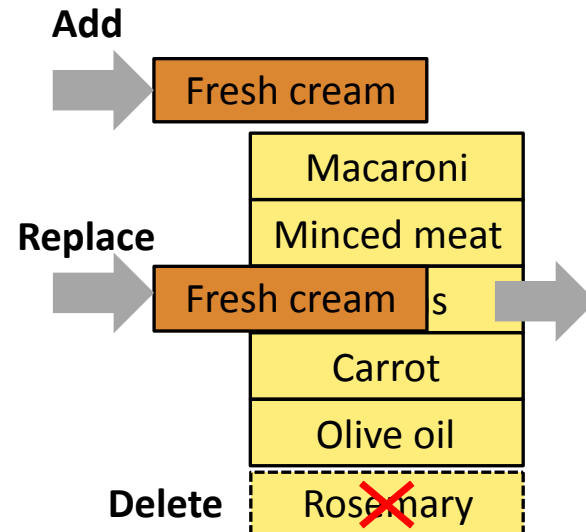

Generator using Genetic Algorithm

Crossover

Mutation

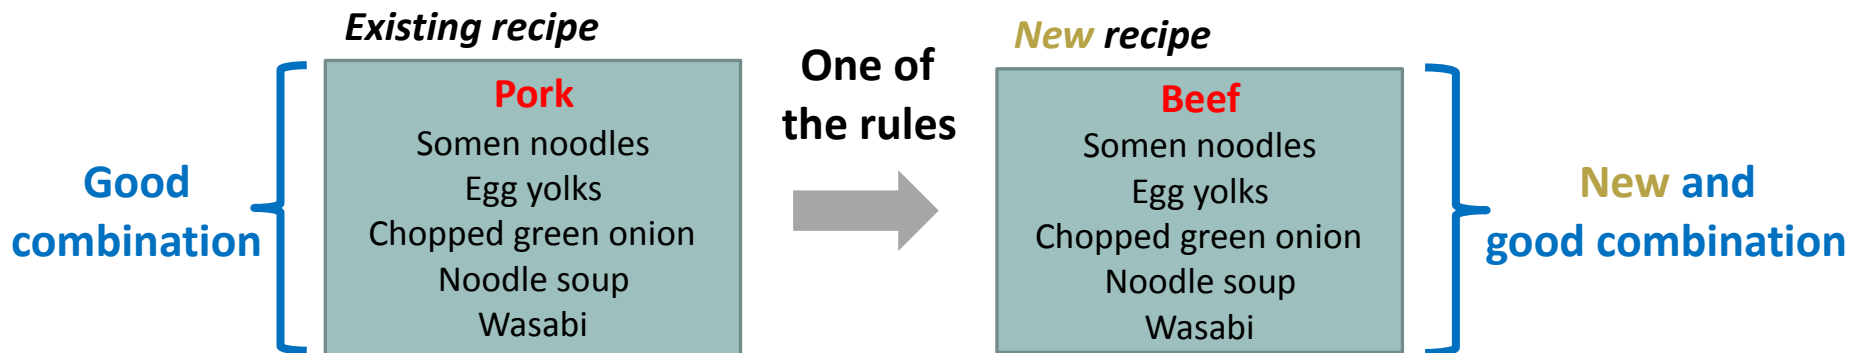

Our Idea

- **Morris**
Random Mutation → The cause of creating unpalatable ingredients lists

- **Proposal : Rule-based Mutation**

It replaces a ingredient with another one by rule

What are appropriate rules for recipe generation?

→ Substitutable Ingredient

Extracting a rule

Existing Recipe A

Pork
Japanese Lee
Chinese cabbage
soup stock

Existing Recipe B

Beef
Japanese Lee
Chinese cabbage
soup stock

Extract

Pork ⇔ **Beef**

✓ 212 rules are found

Applying the rule

Existing Recipe C

Pork
Somen noodles
egg yolks
Chopped green onion
Noodle soup

Apply

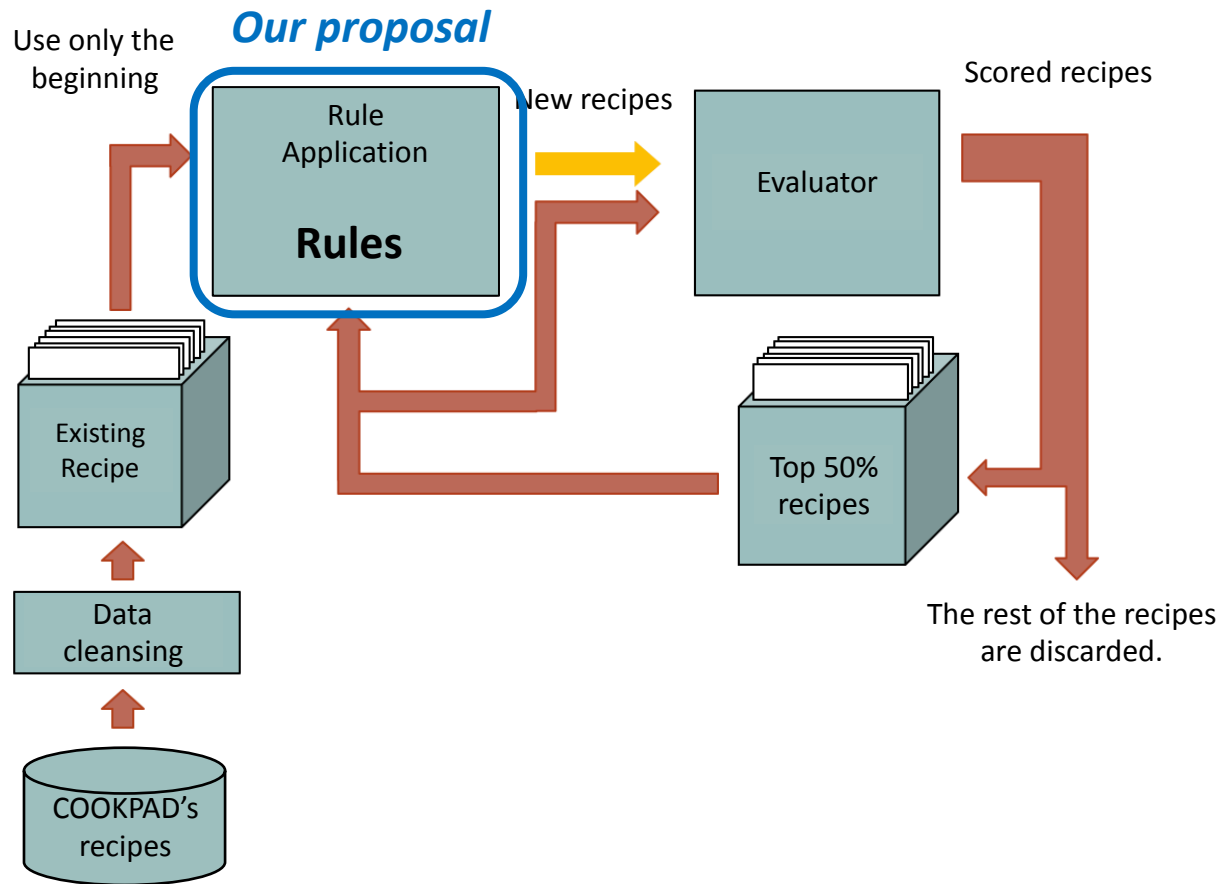

Pork ⇔ **Beef**

New Recipe D

Beef
Somen noodles
egg yolks
Chopped green onion
Noodle soup

System Overview

Evaluation (1/2)

➤ *Subjective review: **Are the recipes tasty?***

Tasty recipes (2 picks)

- Tofu, Seaweed soup, Radish, Mushroom, Duck, green onion
- Tofu , Seaweed soup, Chinese cabbage , Salt, Pepper, Beef

Bad recipes (2 picks)

- Tofu, Chinese cabbage , Carrot, Honey, Cinnamon
- Chinese cabbage, Radish, Oil, Raisins

Others (26 picks)

- Turnip, Carro, Radish, Spinach, Salt
- Egg, Bonito, Bamboo shoots, Beef

:

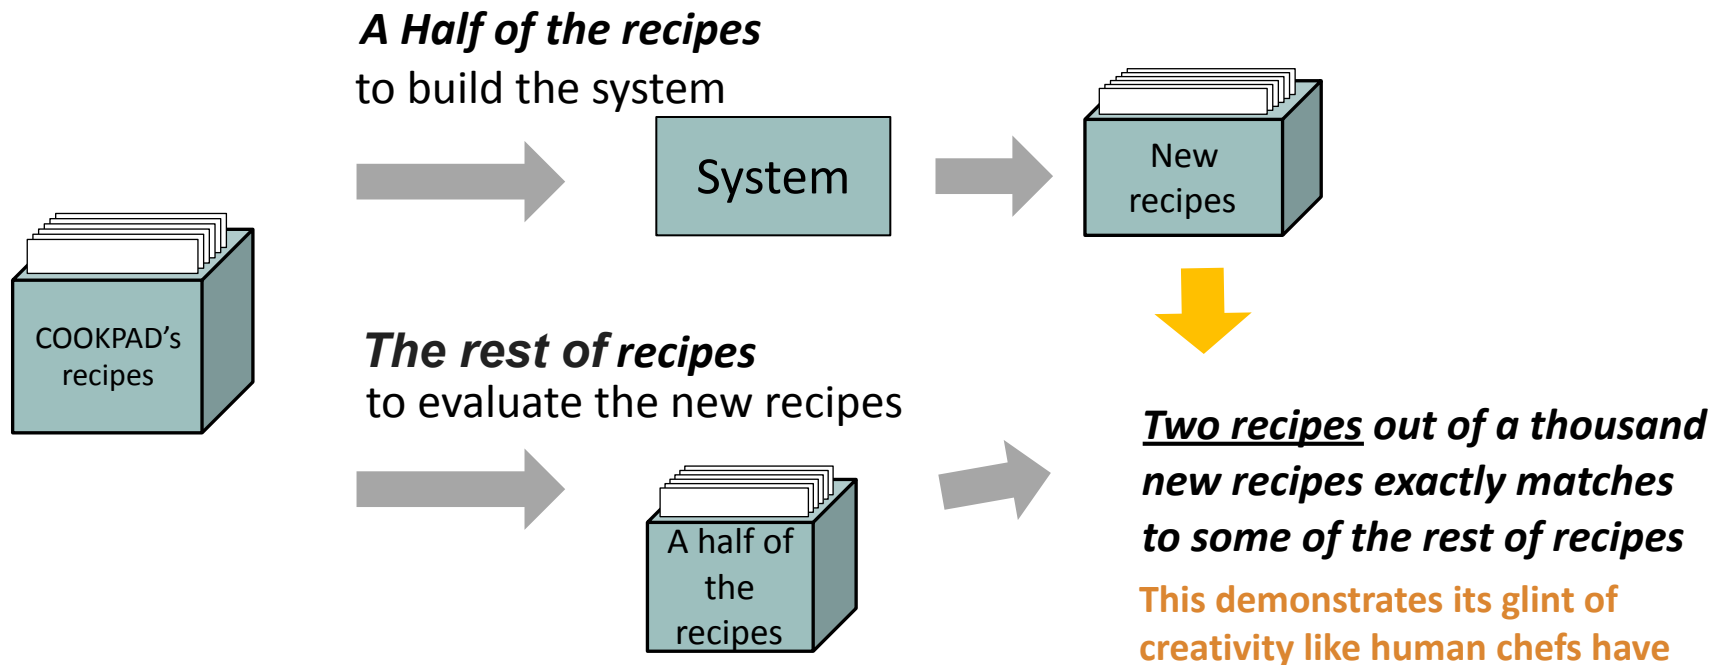

We found the new tasty recipes

Evaluation (2/2)

➤ *Can the system create existing recipes?*

In other words, can the system make as the same recipes as human being makes?

Conclusion

- The new recipe creation method was proposed (by substituting ingredients).
- The system had builded.
- The system showed its capacity to create few new recipes.

Skills in this research

- ***Python, Numba, Numpy, Matplotlib***
- ***AI Algorithms***
 - Coding Genetic algorithm and NN(Neural Network)
- ***Database***
 - MySQL, MongoDB
- ***Text Handring***
 - N-gram, Data Cleansing
